3. Face.....	3
4. Mission	4
5. Executed mission	4
6. Inventory	5
7. Acquisitions	5
8. Warehouses.....	6
9. Various.....	6

1. User

— What's new

- ✓ **User roles:** New roles available in the application.

 **More details in the following video:** <https://youtu.be/U1gUU-Mpfvo?feature=shared>

- ✓ **Training certificates:** 'Certificates' menu is now accessible to Cloud and/or Drone certified users by clicking on their name.
- ✓ **Deleting a user:** A user can be removed from a depot from the depot area. It can also be deleted from the customer area.

2. Dashboard

— What's new

- ✓ **Modification of codes for an executed mission:** corrections to read codes are taken into account in the dashboard for error and void graph data. This improvement is retroactive.
- ✓ **Display:** an option allows errors and gaps to be displayed before or after mission correction. This improvement is retroactive.
- ✓ **Display:** an option allows the errors graph to be displayed with or without 'NO_SCAN'. This improvement is retroactive.
- ✓ **Display:** an acquisition filter displays the error graph with the values corresponding to the selection. This improvement is retroactive.
- ✓ The 'Dashboard' menu can also be accessed from the space of a warehouse.

— Fixes

- ✓ Only items with data are displayed in the graph of visited 'pallet' locations.
- ✓ Checkbox 'Display customer report' is replaced by a button for improved readability.

 **More details in the following video:** <https://youtu.be/uj0PMvheHpU?feature=shared>

3. Face

— What's new

- ✓ **Face modification:** choose exactly which element will be modified.
- ✓ **Face modification:** bay width is maintained or resized when the number of bays is reduced.
- ✓ **Face modification:** add a flight constraint to a cell.

— Fixes

- ✓ Face creation with bays containing a single slot.
- ✓ Face creation with updated naming if starting column number is 0.
- ✓ Correct display depending on face configuration.
- ✓ **Face modification:** active faces with mandatory version number.

 **More details in the following video:** <https://youtu.be/TglFKv7FE9c?feature=shared>

4. Mission

— What's new

- ✓ **Mission creation/modification:** the description of minimum altitude is updated.
- ✓ **Mission creation/modification:** a confirmation message is displayed if the mission is created/modified without an acquisition group selected.
- ✓ **Acquisitions of selected acquisition group:** more detailed scanner acquisition characteristics.
- ✓ **Mission deletion:** clearer message if executed missions are selected for deletion.

— Fixes

- ✓ The mission creation is forbidden if the drone's path crosses forbidden flight bays.
- ✓ Various minor fixes.

5. Executed mission

— What's new

- ✓ An 'Enlarge' button is added to display the mission view.

- ✓ **Executions list:** new column containing the name of the user who uploaded the mission. This improvement is not retroactive.
- ✓ **Modification of slot codes:** a button is added to declare a slot empty and replace the read codes with 'EMPTY'.
- ✓ **Modification of expected code:** display of person's name and modification date. This improvement is not retroactive.
- ✓ **Report configuration:** a new option is added to display the name of the person who modified an expected code and the modification date in the execution report (CSV or PDF). This improvement is not retroactive.
- ✓ **Report configuration:** option to display the original read values in the runtime report (CSV or PDF) if they are different from the read values (after a modification).
- ✓ **Report configuration:** the name of the person who uploaded the mission is displayed in the filename of the downloaded execution report. This improvement is not retroactive.
- ✓ **Report configuration:** the temporary report configuration is kept in memory if there is no report configuration attached to the repository.
- ✓ **Execution downloads:** execution results can also be exported in PDF format.

— Fixes

- ✓ Updated icon sizes.
- ✓ Various minor fixes.

 **More details in the following video:**

6. Inventory

— What's new

- ✓ **Automatic mission creation:** clearer error messages if certain missions could not be created automatically.
- ✓ **Automatic mission creation:** the multi-select option to check 'Picking' for all faces works again.

7. Acquisitions

— What's new

- ✓ **Photo acquisition creation/modification:** description and size of the quality of each photo acquisition (photo or screenshot).

8. Warehouses

— What's new

- ✓ **Warehouse list:** displays date of last mission executed.

9. Various

— What's new

- ✓ The 'Tablets' menu is removed.
- ✓ The loading icon is centered on the page.
- ✓ Various minor fixes.
